

Enquirer Poll 9 in 10 Say JFK's Killer Did NOT Act Alone

The assassination of President John F. Kennedy was a conspiracy — Lee Harvey Oswald did not act alone!

By a resounding margin of more than 10 to 1, that's the verdict of ENQUIRER readers who responded to our special telephone poll on the still-raging controversy over the President's murder.

In our November 22 issue we asked readers to answer "yes" or "no" to the question:

"Do you think Lee Harvey Os-

Do you think Lee Harvey Oswald acted alone when he killed JFK?
YES: 9% NO: 91%

wald acted alone when he killed JFK?"

And a whopping 91 percent said "no." Only 9 percent voted "yes."

In our article announcing the poll, we presented the opposing views of two experts. Supporting

the "yes" side of the issue was famed attorney Vincent Bugliosi, who played the prosecutor in the syndicated TV program: "On Trial: Lee Harvey Oswald."

Bugliosi said the evidence was "absolutely overwhelming" that Oswald "carried out the tragic shooting all by himself."

Supporting the "no" position was Dr. Cyril Wecht, a member of the forensic pathology panel when the House Select Committee on Assassinations reinvesti-

gated JFK's murder in the late 1970s. He argues that it would have been impossible for one bullet fired by Oswald to wound both JFK and Texas Gov. John Connally, who was sitting ahead of the President in the limousine that day.

And ENQUIRER readers overwhelmingly agreed with Dr. Wecht:

JFK's assassination WAS a conspiracy!
